Please find attached a copy of the letter from the Ohio EPA concerning the WorkPlan for the Marble Cliff - Quarries Dump. The letter was written in regards to a conversation that Michele and I had upon her review of the work Plan that I had prepared. The attached Telephone Log is the result of a second telephone conversation and outlines the changes that Michele and I agreed upon.

Sincerely,

Randy Earls

Re: Marble Cliff Quarries Dump
OHD980510226
Columbus, Ohio

Mr. William Messenger, Chief
Pre-Remedial Unit
U.S. EPA, Region V
230 South Dearborn Street
Chicago, Illinois 60604

Dear Mr. Messenger:

The Central District Office of the Ohio EPA has received a copy of the Draft Screening Site Inspection (SSI) Work Plan for the Marble Cliff Quarries Dump, OHD980510226, in Columbus, Ohio. We have the following comments concerning the document:

Site History: Files indicate that there are two separate disposal locations. It is alleged that the Columbus Coated Fabrics disposal site was located where a mudseam made the land unsuitable for quarrying. The sanitary landfill was located in an old quarry.

Site History: Ohio EPA has no documentation of any private industries disposing of wastes other than Columbus Coated Fabrics (CCF). A June 6, 1986 letter from Kaufman Investment Company to the Ohio EPA states that "The CCF waste site was used solely by CCF."

Proposed Sample Plan: It appears that quarrying operations directly south of the site have extended below the ground water table. To assess the possibility of ground water contamination, Ohio EPA proposes that this water be sampled during the SSI.

If you have any questions please feel free to contact me at (614) 771-7505.

Sincerely,

Michele B. Holtom

MCQ

DISCUSSION

CALLED MICHELLE IN REGARDS TO

ATTACHED LETTER Concerning Review of
Marble Cliff Quarries Work Plan

Michele and I discussed the attached letter in detail and came to the following conclusions concerning the Marble Cliff Quarries Site.

→ Two different sites exist; the Kaufman Investment Companies Site (in an actual quarry) and the Columbus Coated Fabrics (in an unquarried mud seam)

→ Also the site history should not state, "along with many other private industries" in reference to alleged dumping. It should only list CCF and KIC.

→ Because of active quarrying to the North of site groundwater samples will be taken from quarry pit.
